

REGIONAL SEMINARS

DEMYSTIFYING CYBERSECURITY SEMINAR

In this half-day seminar, cybersecurity expert, Jim Kilmer, will share details on the various cybersecurity precautions that are essential in 2024 and beyond. He will demonstrate how your organization can implement, train, and manage these processes without breaking the bank by using existing management skills and processes that are already in place related to your HR, legal and administrative requirements. Jim will provide hands-on exercises that illustrate the need for an Incident Response Plan, and how to create one. Step-by-step demonstrations on common security tools and precautions will be shown. Please join us to gain a better understanding of the cybersecurity basics you need to protect your organization.

PRESENTED BY: JIM KILMER

Jim Kilmer brings 27 years of experience in Software Engineering and IT Security to improve business processes and data security awareness in small-to-medium enterprises. His focus is on educating non-technical managers and staff on the need for creating a data security culture within their organization, and running a "Geek to English" translation service for stakeholders struggling to understand the complexities of modern information security. He leads a team of software developers and IT specialists serving a client base spanning three continents for various industries, including Manufacturing, Insurance, Risk Management and Financial Services.
